PRODUCT CATALOGUE

The world’s leading supplier
of beverage dispensing
and cooling equipment
Our deep rooted partnership with customers is crucial

Cornelius is renowned globally for delivering reliable, high quality, energy efficient beverage merchandising and dispensing solutions. Our beer dispense equipment is of proven quality and performance providing reliability and superb levels of serviceability, whilst significantly reducing operational costs and energy consumption. From coolers and cellar accessories to eye catching fonts complimented by an elegant range of precision engineered taps, enables a dispense system to be tailored to the unique requirements of our customers.

Operating across four main global regions: Europe, North America, Central and South America and Asia-Pacific. We have manufacturing sites in the USA, Mexico, UK, Germany, China and India, and sales offices in several other countries around the world. We take pride in offering outstanding service and support at a local level.

1. Beer Tap Range

BT Tap Range

The BT tap range is available with or without compensator and with either a 7mm, 8mm or 10mm dispensing nozzle. The taps are either gold plated, chrome plated or polished stainless steel to a high quality finish.

Dalex Tap Range

Dalex tap range is available in black acetyl and polished stainless steel.

Cask Ale Tap Range

Available in single or double with variety of thread sizes.

**Dalex Tap Range**

**Dalex Fast Pour**

Stainless Steel

An efficient black plastic tap range used in free flow systems for dispensing

Height: 190mm
Width: 40mm
Depth: 150mm

Dimension (H x L x D): 190mm x Shaft length: 28mm x 150mm

**Dalex Non Flow Control/Flow Control**

Stainless Steel

The Stainless Steel Dalex is used in free flow dispense systems for dispensing

Height: 190mm
Width: 40mm
Depth: 150mm

Dimension (H x L x D): 190mm x Shaft length: 25mm x 150mm

**Dalex Non Flow Control/Flow Control Plastic**

Plastic

Cask tap for connection of traditional cask products. Double outlet version available in 3/4” BSP or Y thread.

Height: 190mm
Width: 40mm
Depth: 150mm

**Dalex Flow Control**

Plastic

Cask tap for connection of traditional cask products. Single straight version available in 3/4” BSP or Y thread.

Height: 190mm
Width: 40mm
Depth: 215mm

---

**Cask Ale Tap Range**

**Double Cask Taps**

Cask tap for connection of traditional cask products. Double outlet version available in 3/4” BSP or Y thread.

Height: 155mm
Width: 145mm
Depth: 195mm

Height: 8mm
Weight: 4kg

**Single Cask Taps**

Cask tap for connection of traditional cask products. Single straight version available in 3/4” BSP or Y thread.

Height: 155mm
Width: 65mm
Depth: 195mm

---

**BT Tap Range cont.**

**BT 1500 10mm Dispensing Nozzle Gold Plated**

*Item No.* 147888778

The BT 1500 is a gold plated dispensing tap without compensator. The valve body comes with an integrated 10mm dispensing nozzle. It features a 5/8” thread shaft and is generally for 7mm and 10mm and has a conical handle.

Height: 160mm
Depth: 910mm
Depth with thread shaft: 160mm

**BT 1500 8mm Dispensing Nozzle Gold Plated**

*Item No.* 147888777

The BT500 is a gold plated dispensing tap without compensator. The valve body comes with an integrated 8mm dispensing nozzle. It features a 5/8” thread shaft and is generally for 7mm and 10mm and has a conical handle.

Height: 160mm
Depth: 910mm
Depth with thread shaft: 160mm

**BT 2000 8mm Dispensing Nozzle Gold Plated**

*Item No.* 143190771

The BT2000 is a gold plated compensator dispensing tap. The valve body comes with an integrated 8mm dispensing nozzle. It features a 5/8” thread shaft and is generally for 7mm and 10mm and has a conical handle.

Height: 160mm
Depth: 910mm
Depth with thread shaft: 160mm

**BT 2000 10mm Dispensing Nozzle Gold Plated**

*Item No.* 143190670

The BT2000 is a gold plated compensator dispensing tap. The valve body comes with a integrated 10mm dispensing nozzle. It features a 5/8” thread shaft and is generally for 7mm and 10mm and has a conical handle.

Height: 160mm
Depth: 910mm
Depth with thread shaft: 160mm

**BT 2000 8mm Dispensing Nozzle Polished Stainless Steel**

*Item No.* 143190771

The BT500 is a polished stainless steel dispensing tap without compensation. The valve body comes with an integrated 10mm dispensing nozzle. It features a 5/8” thread shaft and has a conical handle.

Height: 160mm
Depth: 910mm
Depth with thread shaft: 160mm

**BT 2000 10mm Dispensing Nozzle Polished Stainless Steel**

*Item No.* 143190671

The BT2000 is a polished stainless steel compensator dispensing tap. The valve body comes with an integrated 10mm dispensing nozzle. It features a 5/8” thread shaft and is generally for 7mm and 10mm and has a conical handle.

Height: 160mm
Depth: 910mm
Depth with thread shaft: 160mm

2. Redditch Regulator Range

**Primary Regulator**
CO₂ beer applications

- Height (incl gauge and fitting): 160mm
- Width (incl bracket): 115mm
- Depth (incl bracket): 120mm

**Secondary Regulator**
CO₂ and mixed gas applications

- Height (incl gauge and fitting): 160mm
- Width (incl bracket): 115mm
- Depth (incl bracket): 120mm

---

**Cellarbuoy FOB Detector**

The Cellarbuoy FOB Detector is a highly effective low cost mechanical device which provides reliable protection against fob and waste product. When the end of the keg is approaching the Cellarbuoy works by shutting off the product flow preventing fob entering the line between the cellar and the point of dispense. This reduces the amount of wasted product and down time on keg changeover.

- Significantly reduced wastage; increasing profit made on each keg.
- Simple installation and maintenance.
- Suitable for CO₂, Mixed Gas and pump assisted installations.
- Industry proven technology.
- Industry standard 3/8” push in fittings.
- Capable of high flow rates.
- Compatible with all types of current beer line cleaners.
- Option for magnet/reed switch ‘keg empty’ signalling for use with solenoid tap.

- Height: 270mm
- Width: 120mm
- Depth: 85mm
- Weight: 0.27kg

---

3. Ancillaries
3. Ancillaries

Cleaning Sockets
A range of cleaning sockets to fit onto the keg coupler during the line cleaning regime. Maximum operating pressure Up to 50 psig. Smoothes pressure flow spikes within a metered beer dispense system. Height 70mm Width 120mm Depth 75mm Weight 0.13kg

Meter Damper

Height 160mm Width 150mm Depth 50mm Weight 0.15kg

Ale Python Controller

The Ale Python Controller is a compact wall mounted unit designed to provide accurate temperature control of a python for draught ales. The Ale Python Controller unit is used in conjunction with a beer cooler that has a water recirculation facility. Water is taken from the Cooler Python line to cool the unit, then via a short cooling coil. A thermostatically controlled solenoid valve maintains the set temperature by allowing flow through the coil and back to the Cooler Python return line. Water from the tank is then circulated around the Ale Python. The unit should be installed inside the chilled cellar to prevent condensation forming on the tank. Height 490mm Width 490mm Depth 160mm Weight 8kg

Easy Clean System

For manually changing the direction of cleaning sponges. Height 480mm Width 480mm Depth 160mm Weight 8kg
